

PocketPigskin® Installation for Palm OS

2009 Edition

Installing

The HotSync Manager program should be running, and your device powered and connected through the Palm cradle. The HotSync Manager and the Install Tool are Palm PDA desktop applications; they can be found in the Start menu or the Program Files folder under Palm.

- 1) Select the Palm OS installer link on the chosen team's download web page.
- 2) When prompted, select Open to execute the installer. Alternatively, save the installer file to the computer desktop, then double-click on the EXE file to start the installation process.
- 3) Set the destination folder (the default is C:\Program Files\PocketPigskin\PalmOS-142), then select the Install button.
- 4) When prompted, select the Palm user then the Install button. Select OK. Select Next.
- 5) Select the checkboxes of the documents to open when the installer exits.
- 6) Select the Close button to complete the installation, and open the selected documents.
- 7) Press the HotSync button on the PDA cradle to transfer the files to the Palm device.

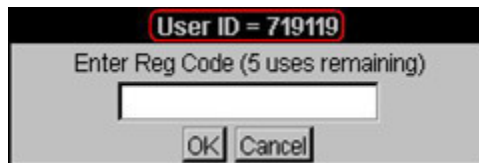

The PocketPigskin® application may be installed manually if the automated installation did not succeed. Refer to the *Installing Manually* section below.

Running on Palm OS

- 8) In the upper right-hand corner of the Palm is the category list ... select Unfiled.
- 9) Click on the PocketPigskin® icon to run the program.
- 10) To move the PocketPigskin® icon from the Unfiled category, select the upper left-hand corner on the device. Select the Category option, scroll down to the PocketPigskin® application, select Main (or other category), then press the Done button.

Registering

- 11) When you first run the PocketPigskin® application it will prompt you to register your product.

Contact support@pocketpigskin.com with the User ID provided in the start up prompt (719119 in this example) to get your registration code. The PocketPigskin® application will not allow searches, editing, nor saving changes until registered. After the use count reaches zero the PocketPigskin® application will prompt for the registration code, and then exit if a valid code is not entered.

Troubleshooting

- a) Verify the sync between the computer and the device was successful by viewing the log file(s).
- b) Go to the Unfiled category and select the SuperWaba icon; the welcome screen should appear.
- c) Contact PocketPigskin® technical support (support@pocketpigskin.com) for further assistance.

Installing Manually

- a) Using the Windows Explorer, go to the destination folder (the default is C:\Program Files\PocketPigskin\PalmOS-142).
- b) Double-click the PocketPigskin® installer EXE file.
- c) When prompted, select the Palm user then the Install button.
- d) Press the HotSync button on the PDA cradle to transfer the files to the Palm device.
- e) Refer to the *Running on Palm OS* section.
